

Husk

RESTAURANT

NASHVILLE • TN

Husk Nashville's beverage program features artfully crafted cocktails, an extensive whiskey collection, and selected wines, showcasing artisan producers, small productions, and rare finds. Organized by soil type, the wine list represents the terroir in which the wines were grown and invokes a sense of place, celebrating the farmers and wine producers of the region. Constantly evolving, the wine list and beverage selections at Husk exemplifies the restaurant's commitment to its ideology.

Southern Beer, Mead, & Cider

The boom in the quality over quantity brewing landscape over the last several years has made serving a multitude of Southern beers not only a possibility, but also a responsibility. We seek out like-minded thinkers that focus on quality products and aspire to have a balanced array of styles for each and every palate.

Husk Cocktails

Depending on the time and place, we allow the bounty of what's in front of us to influence our drinks. Our bar is outfitted with an ever-changing menu rooted in classic cocktails and tippling traditions, all while mirroring the restaurant's commitment to seasonality. A stroll through the garden, talk with a farmer or smell of what's cooking in the kitchen can conjure up a moment of inspiration. We try to take those moments, the smell, the thought, the revelation and put it in a glass for our guests to enjoy. Cheers!

HUSK Wine

As an agricultural product, grapes show a breadth of characteristics from the place in which they are grown. Starting from the ground up, the soil is the foundation that creates the backbone for all grapes. Detailed below are the profiles of each soil type and the particular complexities they can attribute to a wine.

Soil Type

Alluvial (sand, clay, gravel, silt/loess, loam) soils have good water and nutrient retention, which can translate into a more opulent style of wine. Throughout the world, these are the most prolific vine soils and a good place to look for more fruit-forward, approachable and juicy wines.

Sedimentary (limestone, chalk, silex/flint) rock soils are made from solidified mineral or organic deposits. These soils work like a sponge, wicking water away and storing it as reserves for the vines when water is scarce. Highly valued in cool climates because of its heat reflection capabilities, this is a good place to look for bright, balanced, mineral-driven wines and bubbles!

Metamorphic (slate, schist, gneiss) rock soils are formed under pressure from another type of rock, with many color variations and mineral make-up. Dark colors retain and radiate heat, contributing to ripening, helping develop color and more interesting flavors in grapes. Wines can have an underlying mineral quality and can be quite powerful, yet balanced.

Igneous (volcanic, basalt, pumice, granite) rock soils are formed by lava flows above and below the earth's surface. Volcanic soil is formed from molten lava and ash deposited from the earth's surface. Granite is a plutonic rock formed deep under the earth's surface. Resulting wines are typically powerful with an earthy, ashy element, often savory and complex.

Angel Oak Wines

The owners of Husk are proud to present The Angel Oak, wines created and bottled in our own vineyard located in picturesque Valle de Uco, one of the world’s most extraordinary wine regions located just South West of Mendoza, Argentina. We make a white Torrontes, a dry French style Rosé, Premium level Malbec and Assemblage (Blend) and ‘Reserva’ level Malbec and Assemblage (Blend) with extended aging. Consistently a 90-plus rating by Wine Enthusiast, Wine Spectator and James Suckling.

HUSK Whiskey

Whiskey flows through the fountain of youth at Husk, keeping our historic building's bones sturdy and strong. Corn is even more revered, hence our name, Husk, the outer protective layer that cuddles the golden kernels of goodness, giving Bourbon whiskey its fantastic character and texture. We invite you to partake in a brown water journey while in our halls, and we promise you won't regret it, not even tomorrow.
